

FBFM

The Fullbore Flowmeter combine with our Temperature tool will allow you to run a production profile. The FBFM has a three arm spring loaded cage to center the impellers in multiple casing sizes so you only have to buy one tool. The blades design allow the impeller to work on small production rate wells do to the use of low friction bearings and the large cross sectional area. The tool is supplied with ancillary items that allow you to run in all casing sizes from 4-1/2" to 9-5/8".

Features:

- Injection and production flow profiling
- Leak detection
- Low or hi flow rates

Temperature rating	177°C (350°F)
Pressure rating	103.4 MPa (15,000 psi)
Tool Diameter	43mm (1-11/16")
Length	1064mm (41.92") (Electronics + Fullbore)
Weight	3.6kg (8lb)
Casing range	4-1/2" to 9-5/8"
Flow output	10 pulses/revs (directional)
Threshold	<0.5m/min (<1.6ft/min)
Max fluid velocity	90Bpd
Material	Sour Service
Connector	go-connector (single pin)
Flow measure point	414mm (16.3")
