

Roller Centralizer

Revolutionary four-arm spring-loaded cage system designed for precision production profiling and leak detection. One tool, multiple casing sizes, unmatched accuracy in the most demanding environments.

General Specs	Centralizer
Length	31.13"
Pressure rate	18,000psi
Temperature	350 deg F
Temperature	177 deg C / 350 deg F
Material Type	Sour Services
Connectivity	Go Connectors
Operating Range (Min restriction–Max casing)	1-11/16" to 7-5/8" 24# casing. A different set of links can expand the diameter to necessary dimensions (13-13/8"max)
Max Tension	18,000lbf
